I have looked back through the annexation paperwork on file and yes it seems there is an enclave. It specifically says that Kibler will maintain the roadway through the enclave. The enclave appears to be specifically only the roadway. It also stated the terms of maintenance would be dealt with as a separate matter. The county and/or city may have additional agreements/paperwork as so stated in the court order. I hope this answers your question. If you need further assistance, please let me know. Have a great day!
